EXPERIENCE

Software Engineer

Feb 2026 – Present

The Pitch, stadium check-in app (own product)

São Paulo, Brazil

- Shipped to the App Store and Google Play as the sole developer, now at **517 users**, in React Native, Expo, TypeScript and Supabase.
- Made GPS check-in survive packed stadiums on degraded 4G with an offline-first queue and haptic confirmation.
- Designed **13 tables under Row Level Security**, 16 migrations and 4 Edge Functions, so no client query reaches another user's rows.

Software Engineer

Sep 2025 – Dec 2025

Ecco Arte, textile art e-commerce (freelance)

São Paulo, Brazil

- Took an e-commerce from zero to live alone, with **Stripe and PIX** checkout, Melhor Envio shipping and an admin dashboard for stock and sales.
- Blocked the two ways a shop usually breaks, forged webhooks and endpoint abuse, with HMAC-SHA256 verification and rate limiting.

Software Engineer

Jan 2024 – Dec 2025

CineLog, social platform for film (own product)

São Paulo, Brazil

- Built a social network solo through to **TestFlight**, with a realtime feed and end-to-end encrypted messages (AES-256-GCM).
- Shipped dual monetisation, Stripe on the web and Apple In-App Purchases on iOS, behind a Next.js admin panel.

OPEN SOURCE

Eleven pull requests opened in August 2026. Same method every time: find the bug, prove it by running the project's own code, fix it with a test.

- Kodus** (kodus-ai, 1.1k stars), PR #1714. Bitbucket Data Center webhooks dropped silently. Proved it against Atlassian's own payload, fixed with **30 tests**. Triaged severity medium, tier T0.
- Expo**, PR #48977. `expo run:android` hung forever on an unresponsive adb. Added a timeout that kills the process, with tests.
- Backstage** (Spotify), PR #10330. New Frontend System support for the Jaeger plugin, closing a maintainer-requested issue.
- VTEX** (faststore), PR #3451. PWA manifest and preview images dropped from the build by an incomplete allowlist. Fixed with tests.
- Dynatrace, Storyblok, Evolution API, Open Food Facts, The Nature Conservancy.** A TypeScript union type emitting the wrong schema shape, tests for uncovered helpers, and a runtime TypeError.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, HTML, CSS

Frameworks: React, React Native, Next.js, Expo, Node.js, Tailwind CSS

Data & Backend: PostgreSQL, Supabase (Auth, Row Level Security, Edge Functions, Realtime), REST APIs

Payments: Stripe, Apple In-App Purchases, Mercado Pago (PIX)

Tools: Git, GitHub Actions, Vercel, Sentry, Jest, Vitest, TanStack Query, Zustand, EAS, TestFlight

Spoken: Portuguese (native), English (fluent, two years living in Canada), German (A1)

EDUCATION

Universidade Presbiteriana Mackenzie, Computer Science, two years completed

São Paulo · 2018 – 2020

Tamwood Career College, Web Development

Vancouver, Canada · 2022 – 2023

Earlier: IT Support at D2W Racks e Gabinetes and IT Assistant at All Informáticas, São Paulo, 2021.
